

## Communication

|                      |                                 |
|----------------------|---------------------------------|
| <b>Date</b>          | 06-07-2026                      |
| <b>Team ID</b>       | XXXXXX                          |
| <b>Project Name</b>  | Credit Card Approval Prediction |
| <b>Maximum Marks</b> | 1 Mark                          |

### Communication Plan:

Effective communication played an important role in the successful development of the Credit Card Approval Prediction project. Team members regularly communicated to discuss project progress, dataset preparation, machine learning model development, Flask application integration, frontend design, testing, and documentation. Regular meetings helped identify technical issues early and ensured that project milestones were completed on time. Feedback from the project guide was incorporated throughout the development process to improve the application's performance, usability, and overall quality.

### Communication Schedule

| S.No | Communication Type  | Frequency | Channel / Tool              | Participants   | Purpose                                  |
|------|---------------------|-----------|-----------------------------|----------------|------------------------------------------|
| 1    | Team Meeting        | Daily     | Google Meet / WhatsApp      | Team Members   | Discuss daily tasks and project progress |
| 2    | Progress Review     | Weekly    | Microsoft Teams / Classroom | Team & Guide   | Review milestones and feedback           |
| 3    | Bug Discussion      | As Needed | WhatsApp / VS Code          | Team Members   | Resolve coding issues                    |
| 4    | Project Review      | Bi-Weekly | Offline / Google Meet       | Guide & Team   | Review project development               |
| 5    | Testing Discussion  | Once      | Local System                | Team Members   | Verify prediction results                |
| 6    | Final Demonstration | Once      | College Lab                 | Team & Faculty | Present the completed project            |

### Communication Challenges & Resolutions:

| S.No | Challenge Faced                              | Resolution / Action Taken                                   |
|------|----------------------------------------------|-------------------------------------------------------------|
| 1    | Handling missing values and categorical data | Applied preprocessing, label encoding, and feature scaling. |
| 2    | Integrating Random Forest model with Flask   | Saved the model using Pickle and loaded it successfully.    |
| 3    | Ensuring accurate prediction results         | Performed multiple test cases and fixed runtime errors.     |
