

Solution Requirements

Date	28 June 2026
Team ID	XXXXXX
Project Name	Credit Card Approval
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	Authentication	Users (Applicant and Bank Admin) securely log in using username/email and password.	High
2	Authorization Levels	Applicant can submit/view status. Bank Admin can verify, approve/reject and manage applications.	High
3	External Interfaces	Connects to Applicant Database, Credit History Database and ML Prediction Model.	High
4	Transactions Processing	Receives application, validates details, predicts approval and stores results.	High
5	Reporting	Generates reports for approved/rejected applications, prediction accuracy and applicant details.	Medium
6	Business Rules	Approval depends on income, credit score, employment status, repayment history and eligibility.	High
7	Compliance to Laws or Regulations	Protect customer data and follow banking privacy/security guidelines.	High
8	Other	Send approval/rejection	Medium

		notifications and allow status tracking.	
--	--	--	--

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	Predict application results quickly.	Response time < 2 seconds
2	Scalability	Support increasing users and applications.	1000+ concurrent users
3	Security & Data Privacy	Encrypt and protect applicant data.	AES-256 encryption & secure login
4	Reliability & Availability	Provide stable service with minimal downtime.	99.9% uptime
5	Usability & Accessibility	Simple and responsive user interface.	Easy navigation on desktop/mobile
6	Other (Maintainability)	Easy to update ML model and software.	Modular and maintainable design
